<i>Express</i>	<i>User Experience Design (UX)</i>

Brights

The world is changing faster than ever and the need to learn has never been bigger. Rapidly shifting skills-needs create a tremendous challenge for companies, individuals and society. At Brights, we rethink the ways we look at learning. We build solutions which start with motivation, put skills first, leads to return on learning and are better embedded into work life. To succeed we need to adapt, to adapt we need to change and to change we need to learn.
